Resurrection Catholic School – Proposed Transitional Kindergarten Curriculum 2017-18

Language Arts

Preparing students to read by promoting a love for reading, proper use of books, phonics, phonemic awareness, sounds, letters and sight word knowledge

Program: World of Wonders

Math

Math activities are incorporated into our everyday schedule. We focus on basic math vocabulary, sorting, classifying, patterns, comparing, counting numbers from 1 to 20 and shapes.

Religion

Our program helps children to explore their Catholic faith, develop morally, and grow in religious understanding of the world around them.

Program: God Made the World

Social Studies

Students learn to understand the concept of community through learning about their school, their families, community helpers and their friends. They learn the importance of using good manners, following class rules and being a contributing member of their class.

Science

In the TK classroom we think about science in terms of exploring, discovering, and nurturing our students' curiosity about the world around them. Science is introduced into our classroom through many planned and unplanned activities. Some of the many topics we introduce: life cycles, weather, senses, experiments and body knowledge.

Spanish

Twice a week students participate in a twenty minute conversational Spanish class. At this introductory level, songs, basic greetings, colors, numbers, animals, and body parts are covered.

Plus “Handwriting Without Tears”, P.E., Music and Library
